

## Linkage Strategies: Audit for Aged Care Services

This audit has been developed to identify and prompt your use of linkage strategies in service partnering with specialist palliative care. Linkage strategies include: role clarification, written and verbal communication pathways, multidisciplinary team structures, formalised agreements and plans, a designated linkage worker, knowledge exchange and upskilling, and continuous quality improvement. Please answer every item to provide a clear picture on areas of linkage in place at present.

### Role clarification

| Item No: |  | Strongly Agree | Agree | Not sure | Disagree | Strongly Disagree | N/A |
|----------|--|----------------|-------|----------|----------|-------------------|-----|
| 1.1      | We have a clear understanding of our aged care service's role and responsibilities when working with specialist palliative care. |                |       |          |          |                   |     |
| 1.2      | We have a clear understanding of the role and responsibilities of the specialist palliative care service.                        |                |       |          |          |                   |     |
| 1.3      | We communicate with specialist palliative care services to clarify our respective roles and responsibilities.                    |                |       |          |          |                   |     |
| 1.4      | We are satisfied with the specialist palliative care service's role and responsibilities when working with our age care service. |                |       |          |          |                   |     |

Comment on the factors that enable or constrain role clarity between your aged care service and specialist palliative care:

## Formalised agreements and plans

| Item No:  |   | Strongly Agree | Agree | Not sure | Disagree | Strongly Disagree | N/A |
|---|---|----------------|-------|----------|----------|-------------------|-----|
| 2.1   | We have formalised partnership arrangements with specialist palliative care services e.g. a partnering agreement, memorandum of understanding, or terms of reference. |                |       |          |          |                   |     |
| 2.2   | The formalised agreement clarifies the purpose of the partnership.  |                |       |          |          |                   |     |
| 2.3   | We have adequate allocation of resources to sustain these arrangements.   |                |       |          |          |                   |     |
| <p>Comment on the factors that enable or constrain formalised agreements and plans between your aged care service and specialist palliative care:</p> |   |                |       |          |          |                   |     |

## Written and verbal communication pathways

| Item No:   |  | Strongly Agree | Agree | Not sure | Disagree | Strongly Disagree | N/A |
|--|--|----------------|-------|----------|----------|-------------------|-----|
| 3.1  | We have regular contact with local specialist palliative care services.  |                |       |          |          |                   |     |
| 3.2  | We have a clear referral process with specialist palliative care services.   |                |       |          |          |                   |     |
| 3.3  | We communicate effectively about palliative care and advance care planning with the specialist palliative care service.  |                |       |          |          |                   |     |
| 3.4  | We use technologies, such as zoom or skype, to communicate with specialist palliative care services.   |                |       |          |          |                   |     |
| 3.5  | We provide continuity of care between our aged care service and specialist palliative care.  |                |       |          |          |                   |     |
| 3.6  | Both our aged care service and specialist palliative care have easily accessible contact and process information concerning their partner organisation e.g, visiting protocols, chief contact. |                |       |          |          |                   |     |
| <p>Comment on the factors that enable or constrain communication pathways between your aged care service and specialist palliative care:</p> |  |                |       |          |          |                   |     |

### Designated linkage worker

| Item No: |   | Strongly Agree | Agree | Not sure | Disagree | Strongly Disagree | N/A |
|----------|---|----------------|-------|----------|----------|-------------------|-----|
| 4.1      | We have a clear understanding of the role of the linkage worker between our aged care service and specialist palliative care. |                |       |          |          |                   |     |
| 4.2      | Management actively supports and promotes the designated linkage worker role.   |                |       |          |          |                   |     |
| 4.3      | All staff are aware of the designated linkage worker and their role.  |                |       |          |          |                   |     |
| 4.4      | The designated linkage worker is appropriately resourced to carry out his/her role.   |                |       |          |          |                   |     |

Comment on the factors that enable or constrain utilising a designated linkage worker between your aged care service and specialist palliative care:

### Continuous quality improvement

| Item No: |  | Strongly Agree | Agree | Not sure | Disagree | Strongly Disagree | N/A |
|----------|--|----------------|-------|----------|----------|-------------------|-----|
| 5.1      | We routinely monitor the extent to which these linkage strategies are integrated into our aged care service.   |                |       |          |          |                   |     |
| 5.2      | We routinely monitor and evaluate our aged care service’s capacity building interactions (e.g., mentoring, education) with specialist palliative care. |                |       |          |          |                   |     |
| 5.3      | We routinely collect and report minimum data about specialist palliative care access for our clients/residents.  |                |       |          |          |                   |     |
| 5.4      | We routinely collect and report evaluation service data linking client/resident outcomes to specialist palliative care access.                         |                |       |          |          |                   |     |
| 5.5      | All of our quality improvement activities are tied into the plan-do-check-act cycle.   |                |       |          |          |                   |     |

Comment on the factors that enable or constrain continuous quality improvement activities relating to measuring the success of your aged care service partnership with specialist palliative care:

## Multidisciplinary team structures

| Item No:   |  | Often | Sometimes | Rarely | Never | N/A |
|--|--|-------|-----------|--------|-------|-----|
| 6.1  | We utilise shared care plans or documentation with specialist palliative care services.                  |       |           |        |       |     |
| 6.2  | We work with specialist palliative care to provide advance care planning for our clients/residents.      |       |           |        |       |     |
| 6.3  | We undertake case conferencing with specialist palliative care services about client/resident care.      |       |           |        |       |     |
| 6.4  | We work with specialist palliative care on end of life care plans or pathways for our clients/residents. |       |           |        |       |     |
| 6.5  | We have meetings with specialist palliative care services to create and maintain our partnership.        |       |           |        |       |     |
| <p>Comment on the factors that enable or constrain multidisciplinary care between your aged care service and specialist palliative care:</p> |  |       |           |        |       |     |

## Knowledge exchange and upskilling

| Item No:  |   | Often | Sometimes | Rarely | Never | N/A |
|---|---|-------|-----------|--------|-------|-----|
| 7.1   | We participate in professional development activities focused on palliative care and/or advance care planning with specialist palliative care.                                      |       |           |        |       |     |
| 7.2   | Specialist palliative care provide mentoring opportunities for our staff.   |       |           |        |       |     |
| 7.3   | We use multidisciplinary team meetings with specialist palliative care to provide learning opportunities for our aged care service staff.   |       |           |        |       |     |
| 7.4   | We upskill specialist palliative care on our role and responsibilities as aged care providers, our client/resident target group, and our aged care service structure and practices. |       |           |        |       |     |
| <p>Comment on the factors that enable or constrain knowledge exchange and upskilling between your aged care service and specialist palliative care:</p> |   |       |           |        |       |     |
